SUPPLEMENTARY INFORMATION:

I. Discussion

The RIS summarizes the NRC's regulatory oversight of radium-226 under military control, and explains that the NRC and the DoD will coordinate on CERCLA response actions at the DoD sites with radioactive material, including radium, that is not licensed under the Atomic Energy Act of 1954, as amended (AEA) through an MOU. On April 28, 2016, the NRC and the DoD entered into an MOU that governs both agencies' roles and responsibilities with respect to the DoD's CERCLA response actions for radium contamination and other unlicensed material contamination.

The final RIS and an enclosure containing a summary of public comments on the draft RIS and NRC's responses are available in ADAMS under Accession No. ML15167A324. The MOU is available in ADAMS under Accession No. ML16092A294.

II. Congressional Review Act

This RIS is a rule as defined in the Congressional Review Act (5 U.S.C. §§ 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

Dated at Rockville, Maryland, this 13th day of May, 2016.

For the Nuclear Regulatory Commission.
